

# Project: Port Scan on All Listed IPs

## Task Reference: DEV-357

Category: Network Discovery & Service Mapping

Assessment Scope: 15 Authorized Systems (anonymized)

Report Type: Consolidated Host-Level Results

### Consolidated Host-Level Results

| Target ID | Port  | Protocol | Detected Service         | Service / Exposure Details                           | Risk                     |
|-----------|-------|----------|--------------------------|------------------------------------------------------|--------------------------|
| TARGET-01 | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
|           | 54321 | TCP      | MariaDB                  | Database service exposed through a non-standard port | Medium-High              |
| TARGET-02 | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
|           | 53    | TCP      | DNS                      | DNS-related service exposed                          | Medium                   |
|           | 4646  | TCP      | HTTP / Application       | Application-facing HTTP service                      | Medium                   |
|           | 8301  | TCP      | Consul                   | Consul cluster communication endpoint                | Medium                   |
|           | 8500  | TCP      | Consul HTTP API          | Management/API interface exposed                     | Medium-High              |
|           | 8502  | TCP      | Consul                   | Consul-related HTTP service                          | Medium                   |
|           | 8503  | TCP      | Consul                   | Consul-related service endpoint                      | Medium                   |
|           | 8600  | TCP      | Consul DNS               | Service-discovery DNS endpoint                       | Low                      |
|           | 9000  | TCP      | HTTP                     | Application/storage-related service                  | Medium                   |
|           | 9001  | TCP      | HTTP                     | Application or management interface                  | Medium                   |
|           | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
|           | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
| TARGET-03 | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
| TARGET-04 | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
| TARGET-05 | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
| TARGET-06 | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
|           | 53    | TCP      | DNS                      | DNS service exposed to the network                   | High                     |
|           | 80    | TCP      | HTTP                     | Unencrypted web service                              | Low                      |
|           | 443   | TCP      | HTTPS                    | Encrypted web service                                | Low                      |
|           | 7212  | TCP      | PostgreSQL / Application | Database or database-related endpoint                | High                     |
|           | 7213  | TCP      | PostgreSQL / Application | Database or database-related endpoint                | High                     |
|           | 9111  | TCP      | Redis                    | Redis database exposed externally                    | High – Database Exposure |
|           | 9112  | TCP      | HTTP                     | Application/monitoring-related endpoint              | High                     |
|           | 9180  | TCP      | HTTP                     | Application/database-related endpoint                | High                     |
|           | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
|           | 53    | TCP      | DNS                      | DNS service exposed to the network                   | High                     |
|           | 80    | TCP      | HTTP                     | Unencrypted web service                              | Low                      |
| TARGET-07 | 443   | TCP      | HTTPS                    | Encrypted web service                                | Low                      |
|           | 7212  | TCP      | PostgreSQL / Application | Database or database-related endpoint                | High                     |
|           | 7213  | TCP      | PostgreSQL / Application | Database or database-related endpoint                | High                     |
|           | 9111  | TCP      | Redis                    | Redis database exposed externally                    | High – Database Exposure |
|           | 9112  | TCP      | HTTP                     | Application/monitoring-related endpoint              | High                     |
|           | 9180  | TCP      | HTTP                     | Application/database-related endpoint                | High                     |
|           | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
|           | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
|           | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
|           | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
|           | 22    | TCP      | SSH                      | Remote administration interface                      | Low                      |
|           | 80    | TCP      | HTTP                     | Unencrypted web service                              | Medium                   |
| TARGET-08 | 443   | TCP      | HTTPS                    | Encrypted web service                                | Medium                   |

Listed IPs Port Scanning Report DEV-357 (Sanitized)

|           |      |     |       |                                        |        |
|-----------|------|-----|-------|----------------------------------------|--------|
|           | 8443 | TCP | HTTPS | Alternative HTTPS/application endpoint | Medium |
| TARGET-13 | 22   | TCP | SSH   | Remote administration interface        | Low    |
| TARGET-14 | 22   | TCP | SSH   | Remote administration interface        | Low    |
| TARGET-15 | 22   | TCP | SSH   | Remote administration interface        | Low    |
|           | 443  | TCP | HTTPS | Encrypted web service                  | Medium |
